Glossary

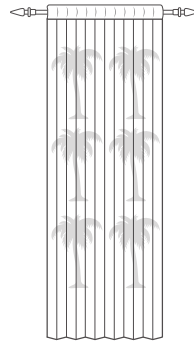

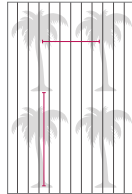

Railroaded fabric

The grain of the fabric runs horizontally, making vertical seams unnecessary. The opposite of railroaded fabric is up-the-roll fabric.

Repeat

The space from one design motif to the next on a patterned fabric.

Up-the-roll fabric

The design runs vertically. The average width is 72" per panel without hems, and there is no maximum height. The opposite of up-the-roll is railroaded fabric.

Bring your space to life

The right textiles help control light, create privacy and complete the look of a room. Add a tailored touch to your facility with Medline's comprehensive and stylish healthcare-focused collection.
